

## Lesson 3 : Canopy

---

*Jacaranda Tree*

**There is a lot of sunlight in the canopy of the rainforest.**

Here, the trees grow very tall. They have shiny green leaves. Some trees have colorful flowers too. Look at the pretty purple flowers!

The jacaranda tree grows in the rainforest canopy. This one has purple flowers. Other ones have white flowers. The flowers of this tree smell very nice too. Birds, bugs, and animals come here. They all enjoy the beautiful tree.

*Monkey*

**In some parts of the rainforest monkeys are everywhere!**

Monkeys love to play in the canopy. That is where they live. Monkeys don't all look alike. They are all shapes, sizes, and colors.
